Art Unit: 1648

DETAILED ACTION

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

Response to Amendment

The receipt of preliminary amendment of 05/11/2006 is acknowledged. Claims 19, 26-28 have been canceled. Claims 1-18, 20-25, and 29 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 7-8, drawn to nucleic acid molecule comprising a nucleotide sequence of HPV-58 L1. (1st product)

Group II, claim(s) 3-6, 9, drawn to host cells. (2nd product)

Group III, claim(s) 10-18, drawn to Virus like particles of HPV-58, vaccines, method of making and using. (3rd product, and methods)

Group IV, claim(s) 20-25, drawn to multivalent vaccines. (4th product)

Group V, claim(s) 29, drawn to isolated polypeptide. (5th product)

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I is known in the prior art as

Art Unit: 1648

evidence by Matsukura et al (Virology, 1990, Vol. 177, pages 833-836), (see the abstract), and Kiril et al (Virology, 1991, Vol. 185, pages 424-427), the references teach human papillomavirus type 58 including sequence of major capsid protein of HPV-58, (see the abstract, and Figure 2). The cited evidence proves that the technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1648

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
